

Agistix Named to Global Logistics & Supply Chain Strategies List of 100 Great Supply Chain Partners

Agistix selected from over 400 nominated vendors for making a significant impact on customer efficiency and supply chain performance

Redwood City, CA -- July 17, 2006 -- Agistix, a leading provider of web-based freight shipment execution and management solutions and services, today announced that it has been selected as one of *Global Logistics & Supply Chain Strategies* (GL&SCS) magazine's "100 Great Supply Chain Partners" in the publication's annual listing of leading supply chain industry vendors.

The GL&SCS 100 Great Supply Chain Partners list for 2006 is the result of a six-month poll in which logistics and supply chain professionals are asked to nominate vendors and service providers whose technology, logistics, transportation or consulting solutions have made a significant impact on their company's efficiency, customer service and overall supply chain performance.

In 2006, GL&SCS received more than 1,800 nominations from small and large companies covering scores of different industries on five continents. More than 400 vendors of every conceivable type of supply chain activity were nominated - from very specialized technologies, to third-party logistics providers to highly specialized transportation services. The 100 companies that received the most qualified nominations were selected to this year's list.

"The purpose of our list is to recognize those vendors that have so impressed our readers that they deserve to be singled out and to be held up as examples for others in the industry," said Brad Berger, publisher of *Global Logistics & Supply Chain Strategies*. "We congratulate Agistix for being selected a 2006 GL&SCS Great Supply Chain Partner."

The nomination of Agistix highlighted how Agistix helped one of the world's largest integrated circuit manufacturers reduce its shipping costs by more than 28 percent within the first quarter of use. Additionally, using Agistix carrier management services, this leading high tech manufacturer went from processing up to 500 shipping invoices per week to receiving one invoice electronically. This change alone cut the company's accounts payable processing time from 70 hours per week to five minutes, generating savings of up to \$5000 a week.

"We are pleased to be selected by our customers as one of *Global Logistics & Supply Chain Strategies*' 100 Great Supply Chain Partners," said Frank Cirimele, General Manager for Agistix. "There is no better endorsement of our solutions

and services than from customers gaining and validating their first-hand benefits. Our web-based applications and services have been designed with significant customer input to assure that we deliver a practical solution for the processing of all freight shipments. Companies use Agistix to gain immediate control, visibility and cost management for their global freight shipments to counterbalance the escalating transportation costs and complexities of today's global supply chains."

The complete listing of the 2006 100 Great Supply Chain Partners and accompanying editorial can be found in the July issue of *Global Logistics & Supply Chain Strategies* or the magazine's Web site at www.glscs.com.
