

## **Agistix Recognized by Supply & Demand Chain Executive Magazine as a Top 100 Supply Chain Solution Innovator**

*Award Honors Leading Vendors with Most Innovative Supply Chain Solutions*

REDWOOD CITY, CA – July 24, 2006 – Agistix ([www.agistix.com](http://www.agistix.com)), a leading provider of on-demand freight shipment execution and management solutions and services, today announced that Supply & Demand Chain Executive (SDCE), "the executive's user manual for successful supply chain transformation," has named Agistix to its 2006 Supply & Demand Chain Executive 100 list.

The 2006 SCDE 100 honor was awarded to vendors that are leading the way in providing cutting-edge solutions and helping enterprises address pain points in their supply chains through the application of new technologies and new processes. This year the magazine focused its judging criteria for its top "100" list on innovation, evaluating hundreds of applicants based on current trends in supply chain enablement to find the most innovative leaders.

"We are honored to be selected for inclusion in the Supply & Demand Chain Executive 100 List," said Agistix General Manager, Frank Cirimele. "Earning this award recognition and endorsement from one of the top supply chain trade magazines further validates the practical innovation that the Agistix solutions provide to our manufacturing customers with our next-generation supply chain solutions and services."

Agistix is a web-based technology and service provider that provides logistics visibility, control and cost management by automating the processes supporting the generation and management of freight shipments. Agistix customers access an enterprise-class, user-designed solution with a centralized platform that enables automated execution and management of freight shipments on a global basis.

An innovative feature of the Agistix system is its dynamic routing guide functionality that allows companies to globally apply and enforce routing guidelines across a dispersed logistics operation. Agistix customers use the dynamic routing guide feature to gain increased logistics efficiency and battle the escalating costs and increasing complexities inherent in today's global supply chains.

## **Agistix Heavy Freight and Small Package Solutions**

The Agistix Heavy Freight solution is a user-friendly system that allows companies to process any freight shipment, domestic or international, utilizing the same data input screens. Dramatic freight cost savings are available through direct access to the daily spot market for any freight shipment. In addition, the Agistix Small Package solution reins in costs by ensuring that users only have access to authorized carriers and services. This access is consistently enforced through centralized, web-based shipping processes resulting in real-time visibility and control of all shipping process resulting in verified dramatic cost savings.

"The corporate executives and line-of-business leaders who rely on the magazine want to know not only what the state of the art is today, but what will be the cutting edge of supply chain transformation and enablement tomorrow," said Andrew K. Reese, editor of Supply & Demand Chain Executive magazine.

"Our goal with this year's '100' is to highlight a broad range of innovations taking place in the theory and practice of supply chain transformation," added Reese. "Therefore, our judging committee looked for solutions across a variety of industries, addressing the needs of companies of varying sizes, and assisting in the transformation of a diverse mix of the functions that make up the supply chain."

For the complete listing of 2006 *Supply & Demand Chain Executive* 100 and accompanying editorial, please see the June/July issue of *Supply & Demand Chain Executive* or the magazine's Web site at [www.sdexec.com](http://www.sdexec.com).
